Reading Time: 3 min

The new DIY Website Builder makes it easy to customize your fundraising website without needing any coding experience.

You will find two Site Builder buttons, as we are currently offering two different DIY builders, while one is the modern version!

Creating a New Page

To access the builder, navigate to your dashboard and find **Site Builder > Pages**. You will be able to create a new page by selecting New page.
You can also edit the current page you have by clicking on the pencil for the respective page you would like to edit.

Adding a New Block

To add a new section or feature to your page:

- Locate the section where you want to add content.
- Click the blue “+ Add Block” button.
- Choose between:
    - Content blocks
    - Features blocks

Once selected, the new block will automatically appear on your page. Where you can edit each field accordingly.

Content Blocks

The Content tab contains general website elements used for layout and information, the best way to

keep your information.

Some common content blocks include:

- Text & Images — Add written content and images.
- Section Title — Create headings for your sections.
- Buttons — Add clickable action buttons.
- Divider / Section Divider — Separate content visually.
- Cards — Display information in card layouts.
- Custom HTML — Insert custom embed code or HTML.
- FAQ — Add frequently asked questions.
- Alert Message — Display important notices.
- Full Width Text & Image — Create larger featured sections.

These blocks help you build and organize the visual content of your website.

Feature Blocks

The Features tab contains fundraising and event-specific tools.
Some available features include:

Donations	Events	Fundraisers	Sponsors & Contact
Donation Form	Event Countdown	Leaderboards	Sponsorship Displays
Site Goal	Event Information	Fundraiser Listings	Contact Forms
Donation Listings	Registration Widgets	Group Goals	Sharing Buttons
Recent Donations Slider			Updates Feed
Climbing Number			
Donor Map			

Managing Blocks

Inside the Page Structure panel, you can:

- Drag blocks to reorder them
- Duplicate existing blocks

- Delete blocks you no longer need
- Collapse sections for easier organization

Changes can be previewed instantly using the live preview window.

Desktop & Mobile Preview

Use the Desktop View and Mobile View buttons above the preview area to see how your website will appear on different devices. This helps ensure your page looks great for all visitors.
